

AVATAR API

Provides:

This API provides the photo and name to a Gmail address.

Key Provisioning:

- No key!

Pain factor (*0=ezpz...5=nightmare*): 

Quotas:

- No quotas!

The Good:

- Easy access - only one line of Javascript code is needed to embed a photo onto a website

The Bad:

- The free version only includes getting the name and profile picture from an email address

The Ugly:

- None!

Location: <https://www.avatarapi.com/>
