

Google Calendar

Provides:

Google Calendar API allows you to display public events and modify private events

Key Provisioning:

Pain factor (*0=easy...5=nightmare*): 

- Head to google console API to enable the google calendar API
- Press create credentials (OAuth Client ID) and fill out the form
- Download json file to use for obtaining an access token

Quotas:

- 1,000,000 requests per day (500 per user per 100 seconds)

The Good:

- Great documentation
- Google has python libraries and detailed instructions for authorization and making requests

The Bad:

- There is less documentation if you do not use google's libraries

The Ugly:

- OAuth 2.0 authorization is required
